

Hello and welcome to the second issue of our new CMP Newsletter.

2018 is well and truly underway and in this edition we will give you more information on the years events; we hope you can join us at.

### ICNARC Annual Conference 2018

This year's Annual Conference will once again bring you a varied programme covering key national clinical audit and critical care topics. We'll be giving updates on our work over the past year and our plans for the future - the programme will include

- Updates on the CMP dataset and systems
- Presentations on specialist topics such as Getting It Right First Time
- Panel and audience debate on auditing the critically ill
- Exhibition space with opportunity to network
- Chance to meet your CMP Case Officer
- CMP prizes

Over 250 delegates have already registered. To confirm your place go to our [website](#) to register today!

**We look forward to seeing you all there!**

### Welcome To The Team!

We are pleased to introduce Olivia Berrill as the newest member of the CMP Audit Team. Olivia joined us in January as the Project Administrator and her training in all things CMP is in full swing.

*"I am very excited to be attending this years Annual Conference, so please do come and say hello; and I look forward to working with you all in the future."*

### Participation Update

The key participation stats for this quarter are as follows:

- 87% of units up to date with submission of Q3 2017-18 data
- 90% of units up to date with validation of past periods of data
- 100% data prior to Q1 2017-18 clean

Ongoing thanks to all participating units for the overwhelmingly outstanding work you've done and continue to do.

### CMP Dataset Workshops

If you're new to the CMP we highly recommend attending our dataset workshop; a one-day course covering the key points of the dataset, advice on data collection and the opportunity to ask questions and share good practice.

The course receives positive feedback - especially for the lunch and refreshments provided throughout the day!

There are three more courses running this year:

[Monday 21 May 2018](#)

[Monday 10 September 2018](#)

[Monday 26 November 2018](#)

Book your space on our [website](#) now or for more information please contact the CMP team at [cmp@icnarc.org](mailto:cmp@icnarc.org)

 Is a new cluster randomised crossover trial our Clinical Trials Unit (CTU) are running, looking at stress ulcer prophylaxis in mechanically ventilated patients. 14 CMP units will be participating, alongside critical care units in Australia, Canada, Ireland and New Zealand. The trial will run for 12 months, and data collection for the UK units will be embedded in the CMP.
