Making a splash!

Thank you for your continued enthusiasm and engagement with the UK-ROX trial. We really appreciate all your hard work - keep it up! Please see our key milestones below:

- 1771 patients have been randomised into the trial as of 9th November, with sites within the NIHR CRN South West Peninsula leading the way!
- 59 sites are open - see if you can spot your site on the map below!

Patient follow up commenced in August. Ahead of sending questionnaires to patients, we have been getting in touch with you to confirm their status. Thank you for responding to these emails in a timely manner, as this enables efficient follow up.

Hats off to...

In the conservative oxygen therapy group, the lowest concentration of oxygen possible should be administered to maintain the patient’s SpO2 at 90(±2)%. Congratulations to the below sites for currently having the best protocol adherence… Keep thinking 90!

- Tunbridge Wells Hospital
- Royal Oldham Hospital
- Sunderland Royal Hospital
- Stoke Mandeville Hospital
- Glangwili General Hospital
- Warwick Hospital
- Torbay Hospital
- Grange University Hospital
- St Richard’s Hospital
- West Middlesex University Hospital

Congratulations to Aayesha Kazi at Royal Blackburn Hospital, for the first successful completion of the NIHR Associate PI Scheme!

Psst… spread the word!

- We now have some short training videos available on our website, covering eligibility, conservative oxygen therapy and consent. Please watch and share these videos with your teams!
- Please join us at the first all site teleconference focusing on intervention delivery, on 19th November, 10:00 - 10:45 via MS Teams. Click here to join!

Wrapping up the data...

Having been open for over six months, the internal pilot phase is now complete. Please ensure the trial database is up to date for all patients randomised up until the end of October, prior to the database lock on 22nd November.

It is important that the data are as complete as possible, as they will be reviewed by the Trial Steering Committee at an upcoming meeting. Thank you for your support with this.
