

Ahoy matey! Welcome aboard Oxy-PICU

Oxy-PICU has set sail on her maiden voyage! So far we have recruited 49 patients!

A big thank you and well done to our sites for their efforts so far.

The Oxy-P-Crew

GOSH	Captain Mark Peters
Southampton	First Mate Michael Griksaitis
St Mary's	Quartermaster David Inwald

Shipmates

GOSH	17 new recruits
UHS	21 new recruits
SMH	11 new recruits
CATS	19 new recruits (incl. in GOSH & SMH figures)

A message from ye' Captain

Thank you for all your help up to this point, we are delighted to have all sites on board.

With 120 patients to recruit over the next six months, awareness amongst crew is key.

If you need any help, contact your local team or the land-lubbers at ICNARC.

Cpn. M Peters

Treasure your data

We will be carrying out our first round of data validation checks shortly. These will highlight any potential issues in the data including missing data and unusual values. Please make sure you have entered the data for all previous recruits on the web portal.

Nick Hudson (data manager) will email you to let you know once the data queries have been generated. You can view them on the web portal by clicking on the red flag.

Pages 9 and 10 of the MACRO guidance document contain full instructions on how to complete any data queries you receive. If you have any questions about data entry, please feel free to get in touch with the Data Manag'rrrr (Nick Hudson) or the rest of the team.

Foxy-PICU's top tips

1. Corrections on the consent form: draw a single line through the error and initial and date
2. If parents agree to point 7 on the consent form, please make sure they provide contact details on page 2
3. A copy of the consent questionnaire should be given to each parent (not one to share)

Shiver our timbers!
